CAREER OBJECTIVE

Motivated Computer Science student with hands-on experience building responsive web applications using React.js, JavaScript, HTML, and CSS. Skilled in full-stack development, UI/UX design, and creating user-focused digital experiences, seeking UI/UX designer or Full-stack developer opportunities to contribute to real-world projects while expanding expertise in modern web technologies.

EDUCATION

BSc (Hons) Computing (2024 – 2027)

Itahari International College | London Metropolitan University | Sundarharaicha-4 Dulari, Morang

PROJECTS

JobsNepal – Freelance Web Application (July, 2026)

- Built a 25+ page job portal in React 19 with Vite 8, implementing complex routing, state management via Context API, and a responsive UI with Tailwind CSS v4.
- Implemented secure authentication with SHA-256 password hashing, rate limiting, input sanitization, Content Security Policy headers, and a 30-minute session timeout.
- Designed a mobile-first UI with adaptive layouts, sliding auth panels, and consistent brand styling across all pages.
- Used modern tooling (Vite, ESLint) for fast builds, linting, and development workflow optimization.

NagarSewa – E-Governance Web Application (2025 – 2026)

- Developed a citizen-focused platform for reporting local issues and tracking resolution progress.
- Built responsive frontend interfaces using React.js and Tailwind CSS.
- Enhanced communication between citizens and government offices through intuitive workflows.

TimeStar – E-Commerce Online Watch Store (2024 – 2025)

- Designed and developed an online watch store with product browsing and search features.
- Implemented a user-friendly interface focused on navigation and product discovery.
- Applied frontend development best practices using HTML, CSS, and Java.

SahakariNet – Cooperative Management System (2026)

- Developed a cooperative management web application using Java, JSP, Servlets, JDBC, and MySQL following the MVC architecture.
- Implemented staff features including member search, deposits, withdrawals, loan disbursement, and transaction management.
- Enhanced system security with role-based access control, session management, and BCrypt password hashing

SKILLS

Frontend: React, HTML5, CSS3, JavaScript, Three.js, Typescript

Backend: Node.js, Postgres, MongoDB, Java

Languages: HTML5, CSS3, JavaScript, Java

DevOps: Git, GitHub

Core Skills: Responsive Design, UI/UX Design
